HYDROMATIC®
HPE SERIES

COOL. EVEN UNDER PRESSURE.

RUNS 40°C COOLER THAN COMPETITION

UP TO $6000 ANNUAL ENERGY SAVINGS

LOWER MAINTENANCE COSTS

PENTAIR

HYDROMATIC® HPE SERIES

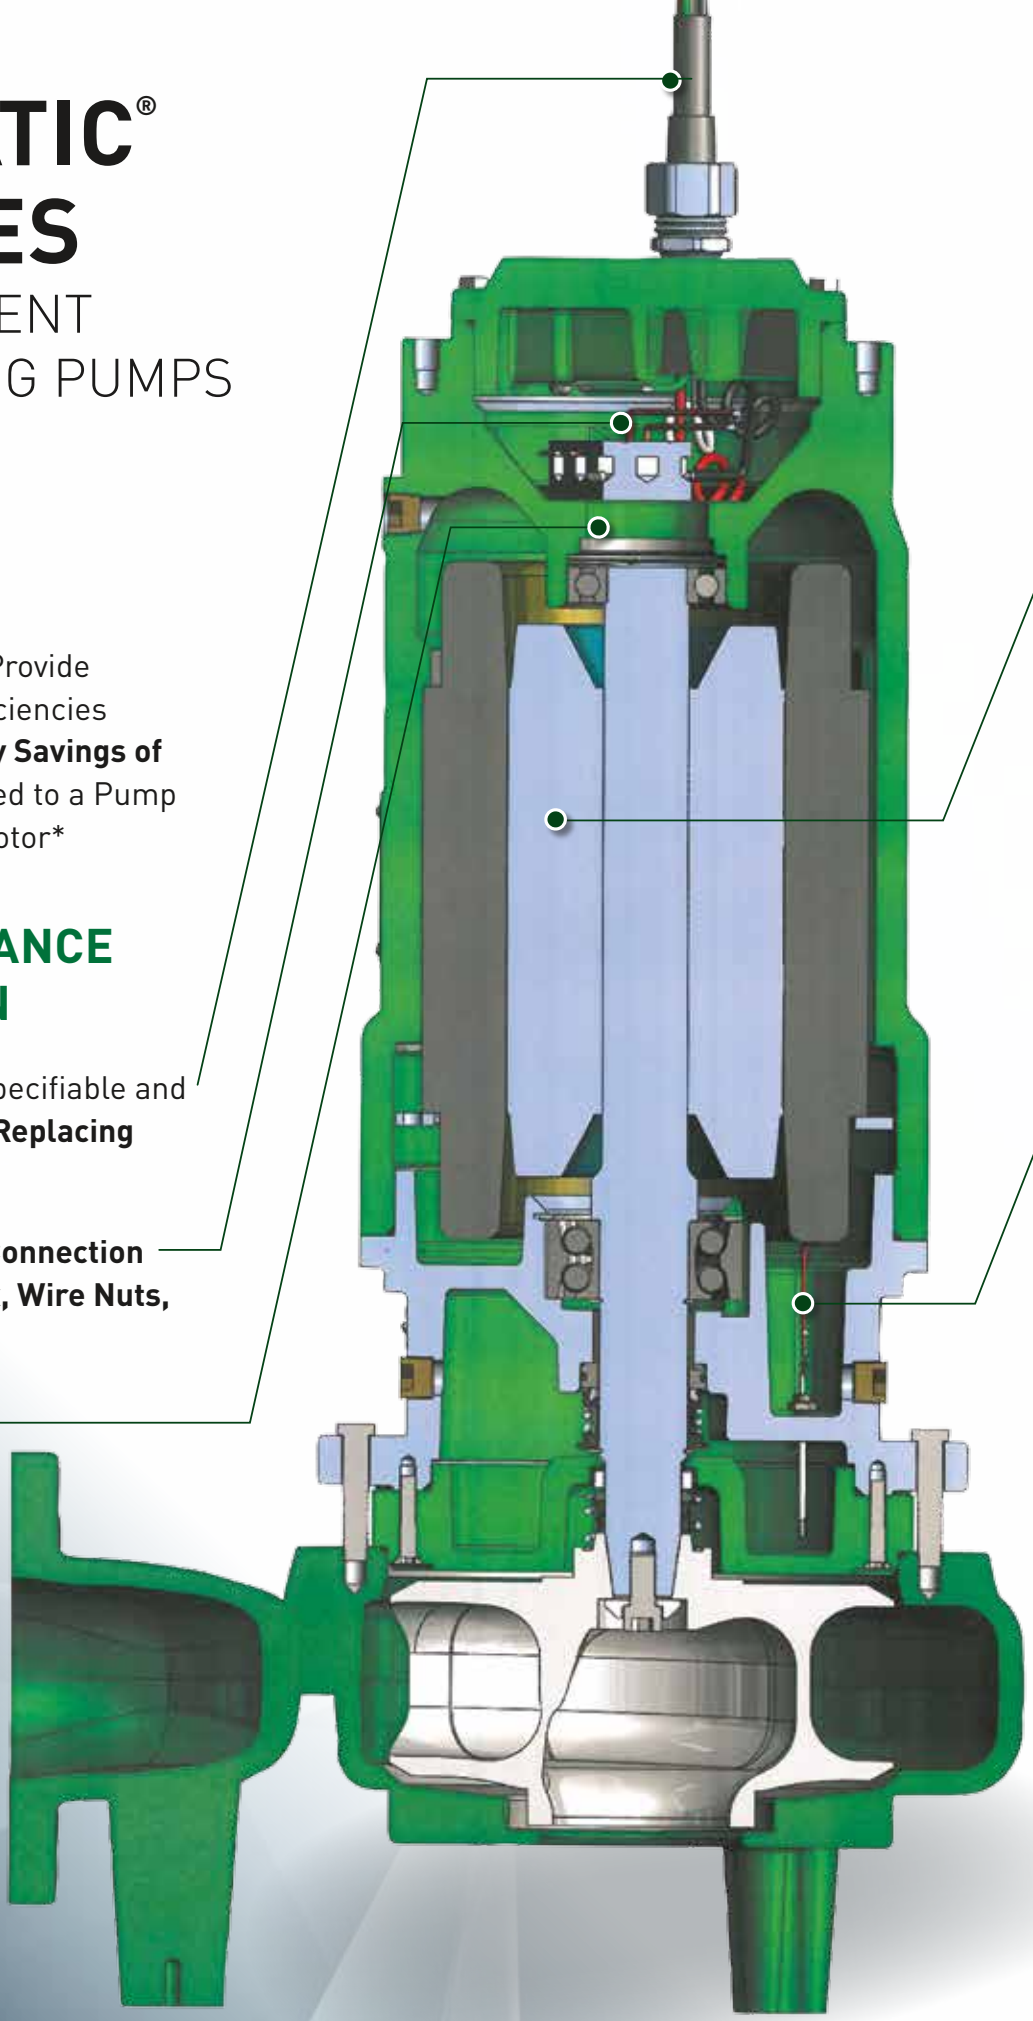
PREMIUM EFFICIENT SOLIDS HANDLING PUMPS

LOWER COST OF OWNERSHIP

- Premium Efficient Motors Provide Superior Wire to Water Efficiencies **Resulting in Annual Energy Savings of up to $6000** When Compared to a Pump with a Standard Efficient Motor*

EASE OF MAINTENANCE AND INSTALLATION

- Quick Disconnect Cord is Specifiable and Field Serviceable – **Avoids Replacing Entire Cord Cap**
- Terminal Block – **Positive Connection Eliminates Connection Box, Wire Nuts, Crimp Connectors**
- **Maintenance Free,** Permanently Lubricated Bearings
- **Hazardous Location Construction Standard**
- Seal and Quick Disconnect Cord Replacements will **NOT** void FM/CSA Certification



LONGER PUMP LIFE

- Non-Toxic Oil Filled Motor for Superior Heat Transfer and Decreased Operating Temperature **Runs up to 40°C Cooler Than Competitive Premium Efficiency Air Cooled Motors for Longer Life**
- Continuous Duty Rated Motor, Class H, VFD Rated
- **Seal Leak Detection** – True Early-Warning System, Housed in Seal Chamber to Alert of Liquid Intrusion into Outboard Seal
- **Industry First Shaft Grounding Option for VFD** – Prevents Premature Bearing Failure
- Condition Monitoring – Optional Bearing Temperature Monitor

***Based on:**
- Condition point of 6000 GPM at 60.5 feet of head
- Standard efficient S12L = 139,500 watts and 201.73 amps
- Premium efficient S12LXP = 126,800 watts and 179.77 amps
- Average run time per day = 10 hours
- Average price per KW/hour = $0.13

HYDROMATIC HPE BEATS THE COMPETITION

FEATURES	HYDROMATIC HPE	COMPETITION
Superior Cooling	✔ Oil-Filled Motor	✘ Air-Filled Motor
Continuous Bearing Lubrication	✔ Continuously Oil Lubricated Maintenance Free Bearings	✘ Grease Packed Bearings That Require Yearly Maintenance
Superior Motor Moisture Protection	✔ Seal Leakage Detection Probes in Lower Seal Chamber	✘ Probes in Motor Housing
Superior Bearing Protection	✔ Optional Shaft Grounding Ring	✘ No Option for Shaft Grounding
Ease of Service	✔ Optional Quick Change-Out Cable Assembly	✘ Quick Change-Out Cables Not Available

QUICK DISCONNECT CABLE
- Easy cord replacement in the field
- Pin and socket joint prevents oil from wicking, vulcanized rubber around the wire acts as a secondary block against moisture

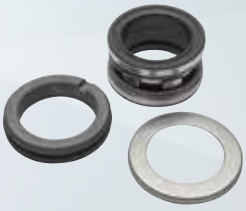
TERMINAL BLOCK*
- Superior electrical connection without the need for wire nuts and crimp connectors
- Reusable. No need to cut wires for service

SHAFT GROUND RING
- Proprietary conductive filaments provide a low impedance path to ground
- Protects the bearings from premature failure caused by VFD induced currents

DOUBLE ROW ANGULAR CONTACT BEARINGS
- Absorbs harmful thrust transfer up the motor stack, ensuring positive location of the rotor in the stator
- B10 life of 50,000 hours over the entire operating range for longer times between service calls

CARTRIDGE SEAL
- Robust, balanced seal design offers longer service life
- Reduces risk of improper installation and premature seal failure
- Faster installation saves labor cost

(select models only)

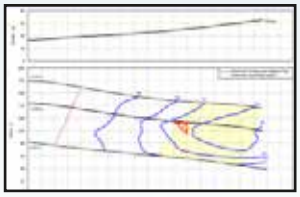


MECHANICAL SEALS
- Type 2100 inboard for durability, less drag and ease of installation
- Type 2 outboard for a wide range of service conditions and reducing downtime
- Silicon carbide as standard, tungsten carbide as option

* Terminal block featured on 210 frame pumps, and select 460 volt and 575 volt pumps 250 frame and larger.

CHOOSING THE RIGHT HPE PUMP

1 Use the online Pump selection tool at **www.Hydromatic.com** to identify pumps that meet flow and head requirements



2 Choose the right pump based on efficiency and solids handling needs
